

1 instal apache 24

<https://www.apachelounge.com/>

pilih tampilan download

Apache 2.4.43 Win64 (karena punya saya OS windows 10 operating 64 bit)

Unzip folder Apache24 pindahkan pada partisi C:

Install dengan comand promt, cd /apache24/bin

Ketik httpd -k install

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.10586]
(c) 2015 Microsoft Corporation. All rights reserved.

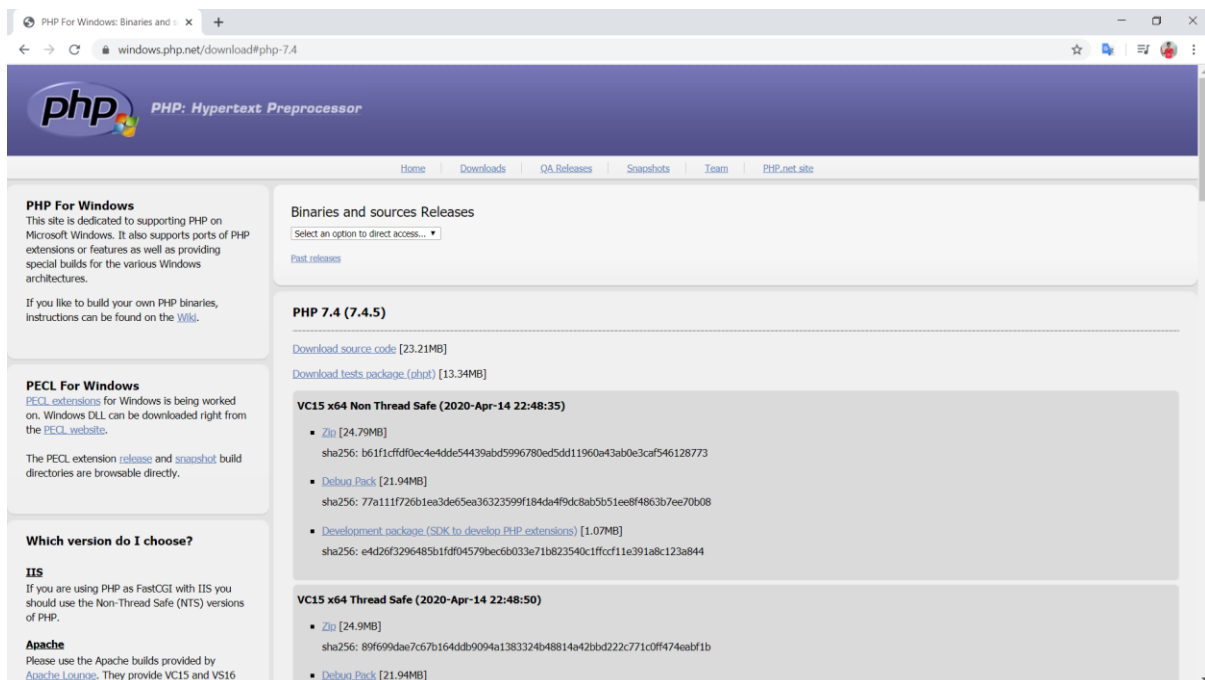

C:\Windows\system32>cd /apache24/bin

C:\Apache24\bin>httpd -k install
Installing the 'Apache2.4' service
The 'Apache2.4' service is successfully installed.
Testing httpd.conf....
Errors reported here must be corrected before the service can be started.

C:\Apache24\bin>
```

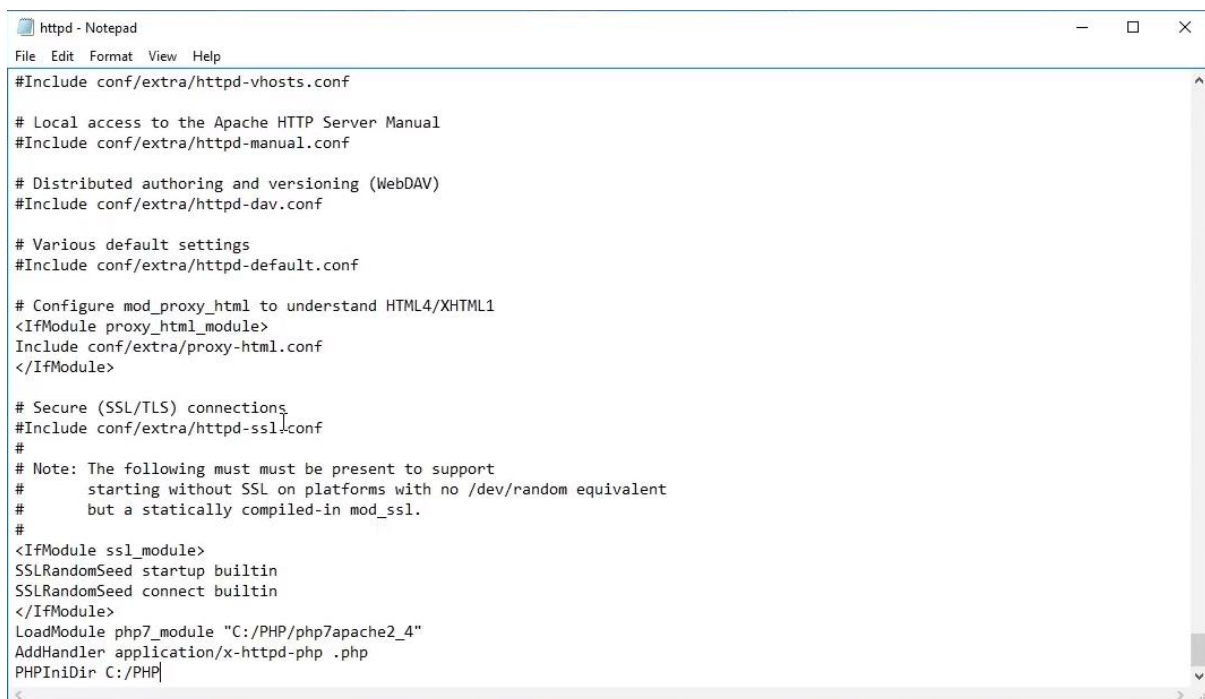

2 instal php

<https://windows.php.net/download#php-7.4>

unzip folder di partisi c: , ubah nama folder php-7.4.5-Win32-vc15-x64 menjadi PHP

buka folder apache 24/conf/httpd

LoadModule php7_module "c:/php/php7apache2_4.dll"

AddHandler application/x-httpd-php .php

PHPIniDir "c:/php/"

Tambahkan text DirectoryIndex index.html index.php

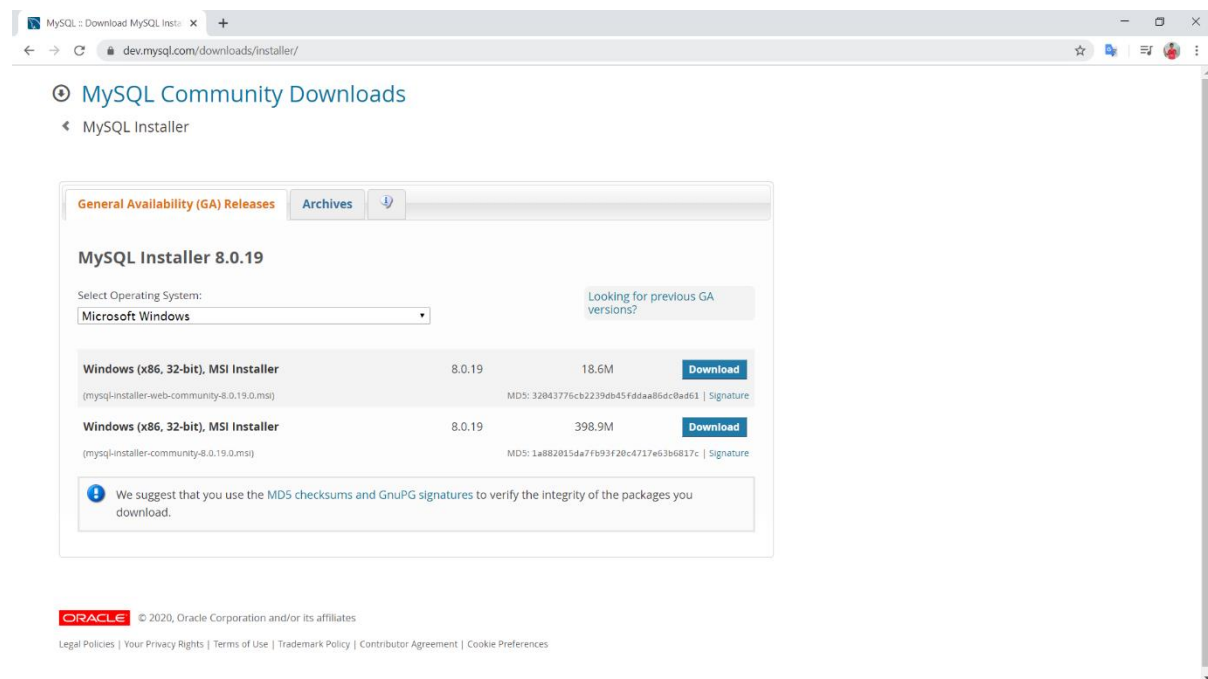

Restart Apache dengan perintah `httpd -k restart`. Tuju direktori document root

(C:/Apache24/htdocs/), ubah nama file index.html menjadi index.php. Buka file tersebut menggunakan editor teks, hapus semua isinya, dan tambahkan kode php

```
phpinfo();  
simpan file
```

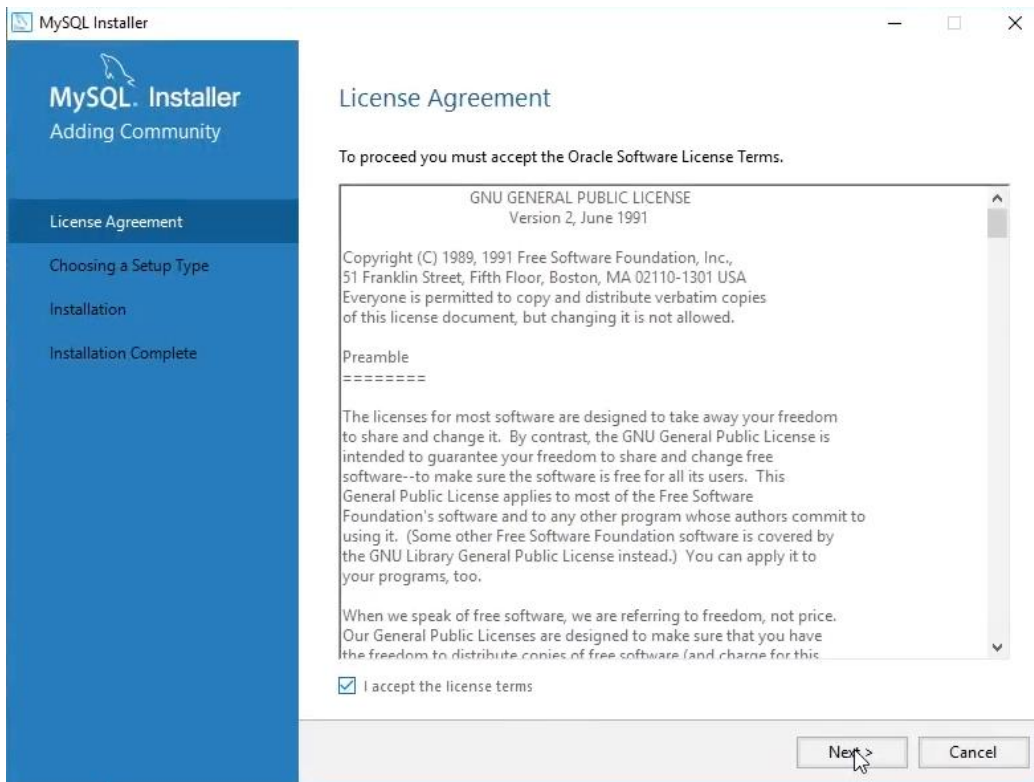

3 install mysql

<https://dev.mysql.com/downloads/installer/>

buka instaler mysql

proses instalasi seperti biasa karena mudah sudah menggunakan interface dan proses otomatis

Masukan username dan password (jangan sampai lupa) ,untuk nantinya authorize database
